FEATURES OF LAZER EDGE - 450

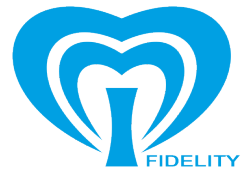

- The revolutionary design has taken Saw Sharpening to new heights and given it Extreme stability. Grinding head moves on special spring steel plates without vibration and absolutely no wear & tear as there are no moving parts touching each other.
- Front rake angle and top rake angle, tooth depth & pitch can be rapidly adjusted with operator friendly controls to achieve extremely accurate tooth forms.
- All gears, levers, cams move on bearings and are enclosed in oil bath giving longer life to the machine.
- Rapid single lever movement for alternate tooth chamfering and grinding without change of wheels.
- Innovative Saw blade [Bearing mounted] clamping system for smoother movement for sharpening accuracy.
- Tungsten carbide tipped pusher for longer life and accurate indexing.
- Suitable for new tooth forming and broken tooth sharpening.
- **Fitted With Vector Base Drive with added Feature to control Feed & Speed (No other Company Provide This Feature)**
